Objective:-

Highly skilled Automation Developer with 2 years of experience in developing, debugging and implementing automated testing solutions using Java and selenium with serenity BDD cucumber and Test NG to test Verizon's internal web application tool Called VPM (Verizon Project Management), Now seeking a challenging role in Automation Development to contribute to the success of a dynamic organization.

SKILLS:-

JAVA / C#(.Net)

- Having strong knowledge and experience in Core Java, including key concepts like data types, variables, operators, control flow statements, loops and exception handling.
- Hanson experience in OOP principles such as encapsulation, inheritance, polymorphism, and abstraction etc.
- Effective in utilization of Java's built-in collection classes (such as Array List, Linked List, Hash Map) ,I am ability to use them effectively for data manipulation and storage.
- Expert in handling exceptions gracefully, including the use of try-catch blocks, throwing custom exceptions, and designing robust error-handling mechanisms.
- Good knowledge in handling file I/O operations, including reading from and writing to files using Java's input/output classes and streams.

AUTOMATION (Web application and Desktop application)

- Good knowledge on JAVA/C# selenium architecture and web driver architecture.
- Hands on experience in element identification, interacting with web elements, handling pop-ups, and validating web page content.
- Familiarity with popular test frameworks such as TestNG or Serenity and .Net.good and ability to create test suites, manage test dependencies, and generate test reports using deployment tools called Jenkins.
- Experienced in managing test data for Selenium tests, including techniques such as data-driven and parameterization of test inputs respective data validation.
- I am working with test automation frameworks built on top of Selenium, such as Serenity, Cucumber, TestNG and JUnit by utilizing these frameworks to create robust and maintainable test automation solutions.
- Having 2 years of experience in developing ,updating and maintaining the POM (Page Object Models) of UI elements based on UI changes and development.
- Expert in tracking UI X path and CSS paths based from application UI.

SQL/Hive Query Language.

- Good knowledge and experience in SQL, including the ability to write complex queries, manipulate data, and perform database operations effectively.
- Having hands on experience in relational database management systems (RDBMS) such as MySQL, Oracle.
- Professional in using SQL's DML statements to manipulate and retrieve data from databases.
- Good knowledge in different types of joins and your ability to write efficient subqueries to retrieve and combine data from multiple tables.

TOOLS

- Test Management Tools: JIRA,Q TEST, HPALM.
- Version Control Systems: Git.
- Agile Methodologies: Scrum, Kanban.
- Generative AI Chat box of AMD and Chat GPT scripting for development.

Professional Experience:-

VERIZON, Hyderabad   **[October 2023 - Present]**

➢ Verizon is a one of the top USA Premium Telecom company.

➢ In Verizon I have a responsibilities of perform UI function,Data base and Backed API response testing for Verizon's internal application VPM .Working with software life cycles, including Waterfall and Agile, and test automation strategies.

➢ Should perform UI Manual testing, need update test case in Q Test tool (TC tracking) and develop automation scripts for Q Test TC's with the separation of Progression, Regression and Health check based.

➢ Automate the API testing using MATE tool to perform health check of the application.

➢ Should update the Test evidence related to story and need to attach automation progression reports for every story after deployment.

AMD - Subcon , Hyderabad   **[September 2021 - October 2023]**

➢ Designed, developed, Debugging and executed automated test scripts using C#, Java, Ranorex, and Selenium to ensure the quality and reliability of AMD's driver software applications and also web UI.

➢ Revised, modernized and updated old codes of automation development bases on modern development standards on new features and UI developments.

➢ Implemented the BDD Cucumber framework to create feature files, step definitions, and automated scenarios for behavior-driven development for driver support web application.

➢ Conducted regression testing, smoke testing, gorilla testing and performance testing to identify and address driver software defects and ensure overall product stability for an end user.

➢ Worked closely with developers and QA team members to troubleshoot and resolve issues during the testing process.

➢ Utilized .NET framework for test automation, data-driven testing, and reporting purposes.

➢ Developed and maintained automated test scripts within version control systems like Git.

➢ Actively participated in agile ceremonies such as daily stand-ups, sprint planning, and retrospective meetings.

➢ Develop the code to test DX10,DX11 encoded based games to test multiple game setups like VR,PS and Desktop platforms for.

EDUCATIONAL QUALIFICATION

➢ I was graduated from KG REDDY COLLEGE OF ENGINEERING AND TECHNOLOGY with CGPA of 6.98

in the year of 2020.

➢ I was completed my Diploma from ELLENKI COLLEGE OF ENGINEERING AND TECHNOLOGY with

75.2 percent in the year of 2017.

PERSONAL DETAILS

Father Name	: Nimmala Subrahmnayam
DOB	: 05-JAN-1998
Address	: 5-72/1, Indiranagar, Chandanagar, Hyderabad Pin 500050

DECLARATION

I hereby declare that all the information mentioned above in the resume is true to the best of my knowledge.
